Certified Disciplined Agile Coach (CDAC)

Architect Owner, Team Lead, DA Product

Agenda

- DA tool
 - Background
 - Vision
 - Current state of development
- Demo

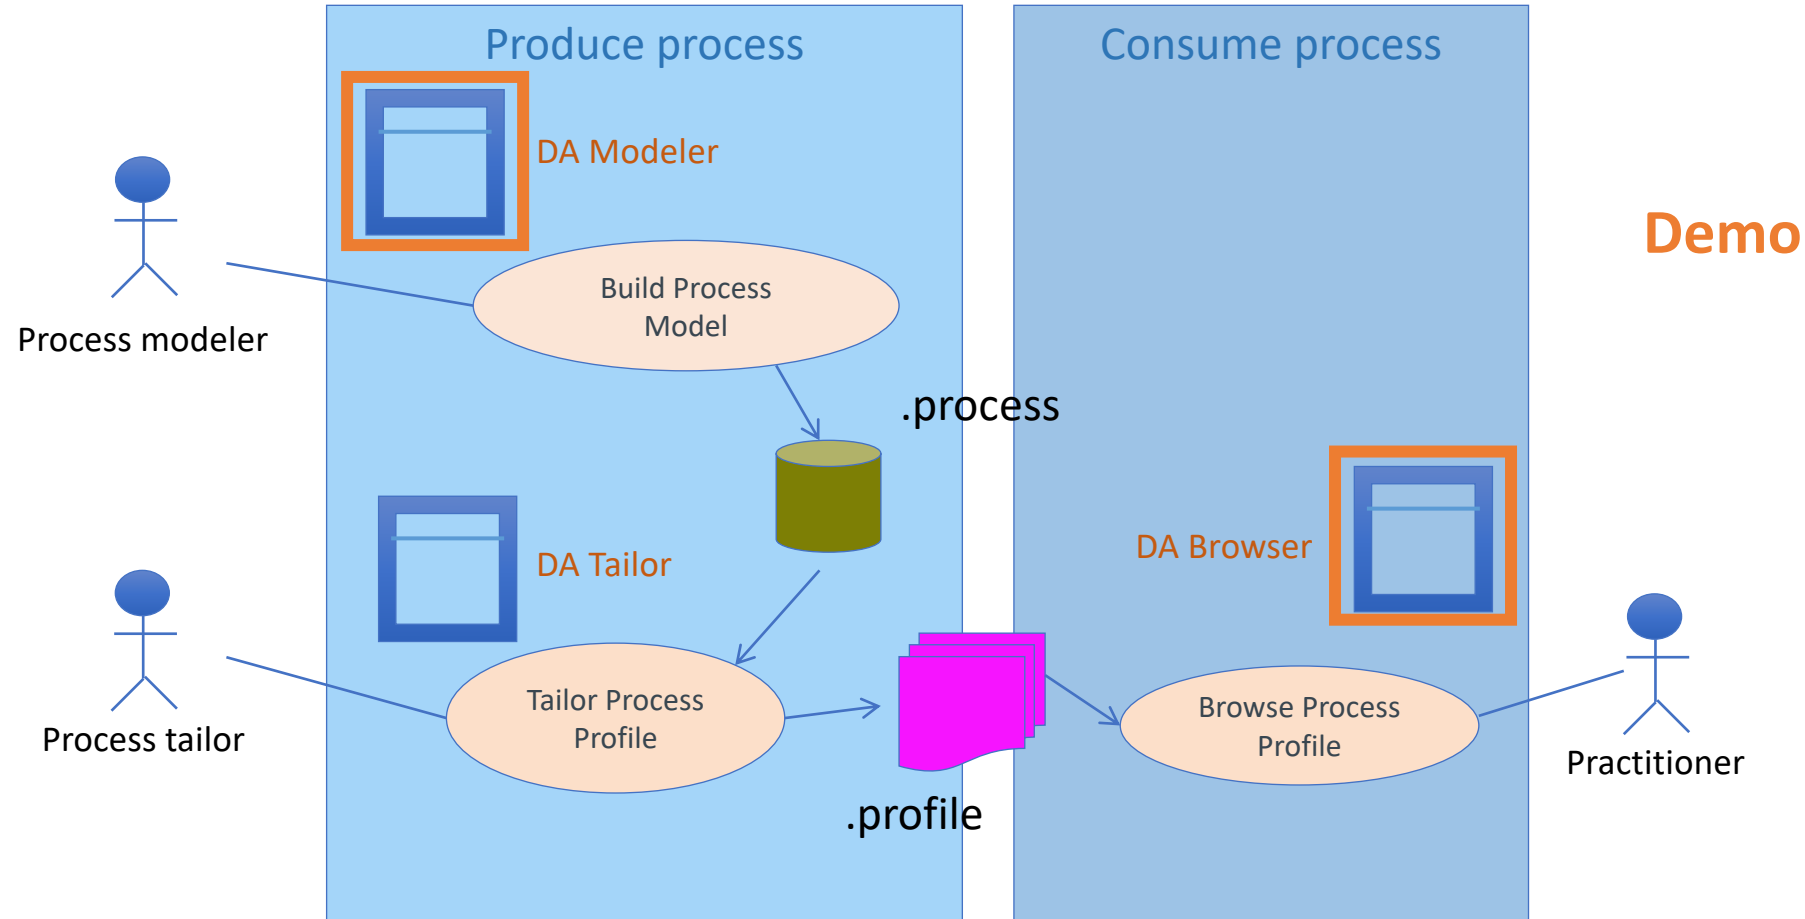

Background

- We have the full smorgasbord of goals, decisions and options described on our web site and in our books, but it can be difficult to digest and translate into hands-on practice
- We want practitioners to be able to quickly understand their ways of working, without having to fight through “the noise” of, for them, irrelevant guidance
- In order to support this, we are creating tools to tailor the DA framework to an exact representation of teams’ ways of working

Vision overview

Current state of development

- MVP 1: Modeler application to create goal diagrams
- *MVP 2: Tailoring and browsing*

Demo

- Modeler
 - MVP 1 capabilities
- Browser
 - Envisioned practitioner user experience
 - Mock-up process profile

Thank you
